WRITTEN OPINION OF THE ' INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/IL05/00354

Roy M	o. I Basis of this opinion			
DV1,KUG	J. I. Duom VI ann opinion			
1 221:11	regard to the language, this opinion has been established on the basis of:			
57				
	a translation of the international application into, which is the language of a translation furnished for the purposes of			
	international search (Rules 12.3(a) and 23.1(b)).			
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:				
a.	type of material			
•	a sequence listing			
	table(s) related to the sequence listing			
	moto(s) to have to the sequence of			
b.	format of material			
	on paper			
	in electronic form			
	<u></u>			
c.	time of filing/furnishing			
	contained in the international application as filed.			
	filed together with the international application in electronic form.			
	furnished subsequently to this Authority for the purposes of search.			
3. In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/IL05/00354

Box-No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement 1. Statement					
erores (c.)	Claims 1-20	N0			
Inventive step (IS)	Claims NONE	YES			
involute out (==)	Claims 1-20	N0			
Industrial applicability (IA)	Claims 1-20	YES			
mousular approaching (in s)	Claims NONE	NO			

2. Citations and explanations:

Claims 1-20 lack novelty under PCT Article 33(2) as being anticipated by Dahlin et al (US Patent Publication NO. 20020184403 A1).

Regarding claims 1, 7, and 14 Dahlim et al teaches a data processing engine, said data access engine located in a first data processing machine and capable of communication with at least one pseudo server located in a second machine (0033;0046);

Wherein a request for a subset of data stored in the data access engine must be routed through said at lest one pseudo server (0046).

Regarding claims 2, 8, 15 and 20 Dahlim et al teaches a data access engine wherein said second data processing machine resides within a LAN in which the data access engine resides (0033).

Regarding claims 3, 9, and 16 Dahlim et al teaches a data access engine wherein said second data processing machine resides outside of a LAN in which the data access engine resides (0033).

Regarding claims 4, 10, and 17 Dahlim et al teaches a data access engine wherein said communication occurs across a content filtering device deployed between the data access engine and said pseudo server (0013; 0033).

Regarding claims 5, 11, and 18 Dahlim et al teaches a data access engine wherein said at least one pseudo server includes at least two pseudo servers (0033; 0046)

Regarding claims 6, 12, and 19 Dahlim et al teaches a data access engine wherein retrieval of data by the data access engine is further restricted by network vaults (0033).

Claims 1-20 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
